

VIBRA feet

It is important to take care of our feet on a daily basis, as they are an area affected by wear and tear and we may experience discomfort due to daily activities, or due to practising sport.

The VIBRA FEET Massager is specially designed to help you take care of your feet and manage any possible discomfort. You will achieve the comfort and well-being you desire by alternating massage and vibration.

Through the shiatsu roller massage technique you will obtain all the benefits of a comforting massage and an improvement, for example, in the internal mobilisation and drainage system of your body.

Its remote control allows you to control all its functions and enjoy a moment of pleasure and relief after a long day:

- Manual programme: vibration only.
- Manual programme: vibration + massage.
- Automatic programme: vibration + vibration + massage.

You can set the intensity with 15 levels that adapt to the massage you need at any given moment, and allow you to rest with this soothing technique for up to 10 minutes.

Vibration and shiatsu massage function with rollers.

This technique has countless benefits, contributing for example to the internal mobilisation and drainage system of your body.
